Electronic lock – for your security

At the time we are starting up the project of replacing your radiators and installing new heating pipes, we will install an electronic lock on the inside of your door. This lock will allow only authorized personnel to enter your apartment during working hours, Monday to Friday 07.30 to 16.00.

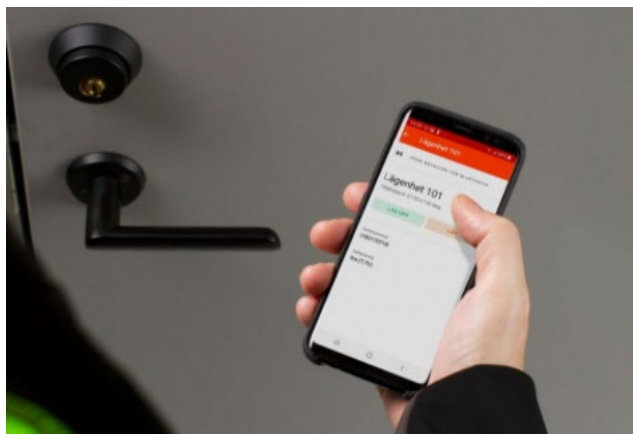

This electronic lock improves the security both for you, our tenant, and for our partners. No unauthorized people may enter your apartment, you don't have to leave your keys to someone and you can be sure Huge's partners will only have access during the scheduled working hours. The lock is very discreet and not visible on the outside of the door. Tenants can use their usual keys during the project.

The lock is easily installed and configured in 10 minutes. No electrical installations are needed since the lock has a rechargeable battery.

Important! Please do not lock your seven-lever lock during working hours.
